

Add-on Course

Social Conscientization Methodology'

Rationale:

It is essential in today's world to cultivate the idea of developing, strengthening, and changing consciousness. Conscientization plays an important role as it prevents a disarticulation of knowledge that often numbs consciousness, without which one can never develop clarity and confidence in one's interpretation of reality.

Teachers have a great responsibility of training minds and addressing issues of social concern in and out of their classrooms. This consciousness needs to be cultivated in the minds of the student-teachers in their formative years and hence, a course like Social Conscientization Methodology is of imminent necessity.

Expected Outcome:

- Student-teachers develop consciousness and skills in observing the invisible in social context and working toward developing, strengthening and changing consciousness.
- Student-teachers become proficient in handling data significantly.
- Student-teachers gain adequate proficiency in articulating inferences and issues.
