II Brief Information about the Activity

Topic/Subject of the Activity	Solar Panel Orientation
Objectives for conducting Activity	• To create awareness about the benefits of solar panel. • To educate the students on the functional mechanics and benefits of the solar power system. • To bring positive change in attitudes and behaviour regarding the use of solar panels. • To help bridge the gap between theoretical environment science and practical renewable energy application. • To serve as a Model for Green Energy in urban educational spaces.
Methodology	• Conducted an on-site orientation session on the college terrace. • Provided a guided visit to the solar panel installation. • Explained the working of the solar power system. • Demonstrated the process of energy conversion from solar energy to electricity. • Interactive explanation by the instructor.
Outcome	• Improved student understanding of practical renewable energy. • Bridged the gap between theoretical knowledge and real-world application. • Increased awareness about sustainable energy. • Highlighted the importance of reducing carbon footprint. • Encouraged environmentally responsible thinking among students. • To bring about a reduction in electricity bills.
