About the Theme

To attain full human potential, education is a primary prerequisite for the development of a just and equitable society and to uphold national development. The entire world is experiencing rapid changes in the knowledge arena. In this context, the National Education Policy, 2020 was approved by the Government of India on July 29, 2020, and the Ministry of Human Resource Development was also renamed as Ministry of Education. This new education policy will replace the 34-year-old National Education Policy 1986.

The necessity for a new education policy was sensed in the country for a long time. Three National Education Policies have been introduced in India till now. These three Policies are National Education Policy 1968, National Education Policy 1986, and National Education Policy 2020. The New Education Policy has been introduced in keeping with the inadequacies of the preceding education policy and the present and imminent needs, which can lead to significant transformative transformations in both the school and higher education sectors. The webinar is an eye-opener in this direction.
